### **Eriez® Deep Reach Separator Features Design Improvements**

Eriez® announces an improved design for its line of [Deep Reach Magnetic Separators](#). These state-of-the-art separators utilize two powerful magnet circuits surrounding a chute to penetrate product flow such as cocoa, powdered cheese, sugar, starch, flour, gypsum and other sticky products to remove ferrous contamination.

According to Eriez, the Deep Reach succeeds where other separators fail to maintain production rates in handling leafy, powdery, moist, sticky or lumpy materials while improving product purity and protecting equipment and personnel.

The Deep Reach features a low profile design for tight places and three unique magnetic circuits to penetrate product flow for optimum separation efficiency. The **Xtreme™** Rare Earth magnet circuit is now available to remove fine or weakly magnetic contaminants, while Eriez traditional ceramic magnet circuits can be selected to remove larger tramp metal. The Deep Reach Magnets may be hinged for easy tramp metal collection or include an easy-to-clean drawer option that provides easy removal of collected tramp metal.

All stainless steel construction is available for food or corrosive environments.

Eriez is recognized as world authority in advanced technology for magnetic, vibratory and inspection applications. The company's magnetic lift and separation, metal detection, x-ray, materials feeding, screening, conveying and controlling equipment have application in the process, metalworking, packaging, recycling, mining, aggregate and textile industries. Eriez manufactures and markets these products through eleven international facilities located on five continents. For more information, call toll-free (888) 300-ERIEZ (3743) within the U.S. and Canada. For online users, visit [www.eriez.com](http://www.eriez.com) or send e-mail to [eriez@eriez.com](mailto:eriez@eriez.com). Eriez World Headquarters is located at 2200 Asbury Road, Erie, PA 16506
